

RICERCHE PARTNER dalla rete Enterprise Europe Network

A Spanish Aerospace research centre focused on Global Navigation Satellite Systems is looking for partners to participate in HORIZON-EUSPA-2023-SPACE calls for proposals and specific EUSPA and ESA indirectly managed actions (Ref: RDRES20230222022)

A Spanish research centre focused in Aerospace technologies is looking for partners and consortia to participate in HORIZON-EUSPA-2023-SPACE and specific EUSPA and ESA indirectly managed actions. The centre has experience in Global Navigation Satellite Systems (GNSS), in the design and evaluation of information security architectures, access control systems and applied cryptography. They want to participate in projects related to GNSS technologies and applications, especially involving security.

Spanish SME is looking for a partner dedicated to agricultural production of cucurbits or similar crops for setting up consortium under Eurostars-3 call (Ref: RDRES20230221025)

Spanish SME producer of fertilizers is looking for a partner to apply to Eurostars-3 call. The aim of the project is to develop treatments based on control and prevention of aphid, as well as viruses carried by these, in cucurbits. The partner sought should be a company with enough crops to test the developed products within the project.

A Belgian SME is looking for partners or to join existing projects for HORIZON-CL4-2023-HUMAN calls (Ref: RDRBE20230220011)

The company's mission is to help companies/research centers of all sizes to set up and operate automated machines equipped with their own control system.

The company is an integrator of special machines. As a mechatronics engineering design office, they can contribute by developing, modernising, or modifying customised equipment for the industry, at any phase of a research project's lifecycle, from inception to exploitation.

Partners sought to conduct clinical trials and to response to EU funding calls on neurodegenerative diseases of the central nervous system (CNS) or for the development of disease-modifying drugs (Ref: TRFR20230208001)

Based in Paris area since 2015, a biotech/medtech startup brings a new technology to discover, identify and rapidly detect molecular biomarkers of complex diseases in blood.

They have a proof of concept (TRL 6) for a predictive PCR diagnostic test for brain amyloid as a risk factor for Alzheimer's disease. They are currently looking for partners involved in clinical trials on CNS neurodegenerative diseases or disease-modifying drug development. Partners are also sought to respond to EU calls.

Flexible hydrogen pipes are searched (Ref: BRFR20230224002)

A French company is developing a new concept of energy production needing its storage via hydrogen. The gaseous hydrogen would be kept into tanks, connected to each other by flexible pipes. These pipes should resist a pressure of 350 bars minimum. Commercial partnership is proposed for these flexible pipes used in marine conditions.

Polish company operating in the installation industry is looking for manufacturers and suppliers of energy equipment (Ref: BRPL20230214012)

A Polish company from the installation industry performs ventilation and air-conditioning, water and sewage, refrigeration, heating, electrical installations and lighting systems, as well as technological and industrial installations. The company is looking for foreign entities to cooperate on an energy optimization project. They are interested in: purchase of equipment for energy projects, partnership and representation of equipment of foreign entities related to the energy industry in Poland.

French start-up looking for industrial partners and suppliers for its innovative anti-tailgating device to avoid accident (Ref: BRFR20230216018)

To bring their anti-tailgating device to the market, a French start-up is looking for experienced European suppliers and manufacturers. The product is fully operational, and there is an existing MVP. The French start-up is now ready for the manufacturing phase and is looking for expert suppliers and manufacturers to cooperate through the launch of the first batch of products. Particularly electronic component suppliers and assembly line manufacturers. In the first stages, the demand for the product is expected to be low; hence, they are looking for partners that can work with smaller batches.
