[A Romanian wholesaler of machinery and equipment is looking for manufacturers and distributors of machinery and equipment to cooperate under a supplier agreement](#) (BRRO20240209007)

A Romanian wholesaler of machinery and equipment is looking for manufacturers and distributors of equipment for lifting and transporting installations, industrial automation, spare parts for bridges and cranes, electrical apparatus. The company is looking forward to cooperating under a supplier agreement.

[Researching and prototyping of semiconductor thin film devices with selective contacts to couple heat and electrical current](#) (TRAT20240205020)

An Austrian heat pump manufacturer wants to build the next generation of heat pumps based on semiconductor devices. Such devices could transport heat to work as cost-effective, scalable, and silent heat pump for any purpose. Based on commercial agreements, the company is seeking partners in semiconductors research and manufacturing to (1) evaluate the feasibility of the idea to use semiconductors as heat pumps, (2) form a consortium to research and build prototypes.

[A Spanish research centre seeks partners to participate in the call HORIZON-CL6-2024-CLIMATE-01-4](#) (RDRES20240205012)

A Spanish research centre is looking partners for apply to the call HORIZON-CL6-2024-CLIMATE-01-4. The centre has a wide experience in artificial intelligence, especially explainable AI and trustworthy AI following the ethical guidelines of the European Commission, deep learning, and edge computing distributed ledger technologies, blockchain, cybersecurity, deep tech, internet of things, natural language processing, etc. They seek research and development cooperation agreement.

[A Spanish research centre seeks partners to participate in the call HORIZON-CL4-2024-TWIN-TRANSITION-01-03](#) (RDRES20240205005)

A Spanish research centre is looking partners for apply to the call HORIZON-CL4-2024-TWIN-TRANSITION-01-03. The centre has a wide experience in artificial intelligence, especially explainable

AI and trustworthy AI following the ethical guidelines of the European Commission, deep learning, and edge computing distributed ledger technologies, blockchain, cybersecurity, deep tech, internet of things, natural language processing, etc. They seek research and development cooperation agreement

[French supplier of sustainable solutions and processes for mechanical powder processing is looking for industries or laboratories with complementary solutions for grinding, drying, micronization, classification, dry powder processing or protein extraction](#) (TRFR20240202019)

Since 1933, the French company has specialized in the design and production of industrial equipment for grinding, drying, micronization, classification, and dry powder processing, ranging from laboratory to industrial scale. Their solutions are applicable to various sectors including milling, agri-food, chemistry, minerals, construction materials, and other industries. They are looking for industries or laboratories offering complementary technologies.

[Electric vehicle charging infrastructure, energy efficient and smart electrical solutions for industrial and residential usage, photovoltaic related products and management systems are requested under commercial or supplier agreements](#) (BRBG20240201029)

A Bulgarian company active in the field of electric vehicle (EV) charging infrastructure and other innovative energy products is looking for foreign partners who would like to expand in the Balkan region and/or can supply it with EV charging components, products, management software, photovoltaic related products and management systems, energy efficient solutions and smart electrical solutions for industrial and residential usage under commercial, supplier and outsourcing agreements.

[Recovery of metals for valorization from surface treatment water, before or after processing in the depuration plant](#) (TRES20240126009)

A Basque SME with more than 30 years of experience in the electrolytic coatings sector is actively seeking for technology partners or solutions for the recovery of metals, including nickel, copper, zinc, and chromium, from surface treatment water. The objective is to explore innovative approaches for metal valorization either before or after processing in the depuration plant. The company is looking for a commercial agreement with technical assistance.

[A French international trading and distribution company is looking for new agri-food suppliers in the frame of commercial agreements](#) (BRFR20240126001)

[A German construction company is urgently looking for subcontracting partners in the field of heating, plumbing, ventilation and electrical work.](#) (BRDE20231215004)

A German construction company with focus on building technology is looking for subcontracting partners in the areas of heating, ventilation, plumbing and electrical for several upcoming construction projects in Germany. The company is searching for a reliable and experienced subcontracting partners from EU countries. It is essential that the future partner can offer German-speaking site management.

[An Irish Carbon Management and Carbon Exchange SaaS platform is looking to partner with Universities or R&D institutions capable of developing A.I and machine learning technology to safeguard against fraudulent carbon offset transactions.](#) (TRIE20240202017)

An Irish Carbon Management and Carbon Exchange SaaS platform is looking to partner with Universities or R&D institutions capable of developing A.I and machine learning technology to safeguard against fraudulent carbon offset transactions. Simply, the platform connects businesses with local landowners to help meet their net zero goals.
