

RICERCHE PARTNER dalla rete Enterprise Europe Network

Greek entrepreneur seeks innovative products and technologies for renewable energy projects (Reference: BRGR20230118008)

A Greek engineering and renewables expert is looking for new solutions to integrate into industrial and engineering installations in Greece, with particular focus on wind and solar energy. This Greek SME offers customised and effective solutions for energy efficiency for its customers. The client has long-standing links with various industries in Greece and can approach them with new innovative solutions from foreign providers, for example in order to propose solar thermal installation on their premises. This SME employs a small but select team of skilled staff and works all over Greece, as well as Bulgaria and North Macedonia. The Greek entrepreneur is looking for innovative partners and products in order to strengthen his company's position in the industrial energy projects and services sector.

HORIZON project idea LurenDa: Platform based formation of resilient and sustainable value networks using real time data value streams for the European aerospace industry - One partner from European law and data law are sought (Reference: RDRDE20230109002)

In order to complete the consortium, 1 partner from European law and data law are sought. The partner should be an expert in European Data law Compliance with all legal requirements for handling sensitive data governance.

Deadline for Expression of Interests: 20.02.2023

EIC Pathfinder Open 2023 – Looking for company or research institution to test and validate in vitro tumor models using anti-cancer drugs (Reference: RDRDE20221208020)

Two German and a Spanish research partners are looking for a partner for entering the EIC pathfinder open call in 2023. The planned project aims at generating patient-derived tumor spheroids or organoids as models for the native tumor. A special focus will be attributed to the tumor matrix. The partners are looking for a company or research institution from outside Germany or Spain to work on the substance screening.

A Dutch company is looking for business partners in EU Countries to build an international network for cross boarder market entry support on Energy Transition, Smart Mobility & Circular Economy, and Digital Health & MedTech (Reference: BRNL20230115003)

The company provides active support to companies with international ambitions. They help understanding the new markets. To lower the barriers to entry to other markets in many more countries in Europe, the company is looking for business partners who can offer the same kind of services in their home country. Companies with local market expertise & network, willing to work in a strong partnership of international consulting companies and offering similar services in their home country.

Looking for a tech provider to transform virtual into augmented reality (AR) experience (Reference: TRES20221202022)

Language school concept for children from the age of one, based on a differentiated and innovative methodology. Our very own method, Kids&Us Natural English, is based on the natural process of mother tongue acquisition and this is why we treat our students as potential native speakers. Children are introduced to the new language through stories with charismatic characters in everyday familiar situations. Our network of franchises is in full expansion. Over 157,000 children in Spain, Italy, France, Belgium, Czech Republic, Andorra, Mexico, Japan and Vietnam are learning English in one of our 570 Kids&Us language schools. Our online platform has a virtual agent, the Kids&Us companion, which interacts with students, helping and guiding them throughout their learning path. The proposal should transfer our current virtual agent and other digital elements into an augmented reality experience for our students, both in the classroom and/or at home. The solution must be valid and appropriate for its use in face-to-face classes taught in Kids&Us schools (group space), as well as in the student's home (individual space), allowing interaction and bidirectional communication. **APPLY FOR THIS CHALLENGE HERE:** <https://ise-challenges-2023.b2match.io/participants/6#498298>
