

RICERCHE PARTNER dalla rete Enterprise Europe Network

French company specializing in solutions for precision measurement and calibration in temperature and pressure is looking for manufacturers of measurement and calibration equipment in the field of water and air quality for a distribution agreement. (Ref: BRFR20231019007)

The company is a French distributor specialized in metrology equipment. The company distributes a range of products, such as temperature calibrators (baths; ovens; thermometers; temperature probes) and pressure calibrators (pneumatic and hydraulic pressure generators; calibrators and standard manometers). In order to complete its product range, the company is looking for manufacturers of measurement and calibration equipment in the field of water and air quality for a distribution agreement. Specifically, they are looking for measurement and calibration equipment for water and air quality in industrial environments.

Waste biomass-derived biopolyols and technology piloted in Cyprus seeking partners in the polyurethane supply chain and/or biodiesel producers. (Ref: BRCY20231016008)

Cypriot start-up producing biomass-derived bio polyols is seeking potential customers and distributors in the polyurethane supply chain (suitable for rigid insulation foams, adhesives). Also looking for co-development opportunities via joint venture with existent biodiesel producers, offering the capacity of valorising crude glycerine and residual biomass through its patent-pending technology.

An animal feed distributor/wholesaler from the north part of Spain is looking for innovative manufacturers in the animal feed industry to distribute in Spain. (Ref: BRES20221216013)

A Spanish animal feed distributor/wholesaler that has over 40 years of experience in the industry is looking for innovative manufacturers to distribute in Spain. They already are distributors of several well-known brands of animal feed for a number of products such as vitamins for animal performance, customized premixes, phytosanitary products for all farm animals, or plant-based nutraceuticals and bioactive compounds for cats and dogs..

Revolutionizing Mental Health: VR Therapy for Phobias and Anxiety. Slovakia-based company is looking for research and development partners (Ref: TRSK20231006006)

A Slovakia-based tech company presents an advanced VR therapy solution addressing phobias and anxiety. Their innovative approach merges virtual reality and gamification techniques, enhancing therapy engagement and effectiveness. By offering immersive, user-friendly experiences, the company revolutionizes mental health treatment. The company is now looking for a research and development cooperation agreement.

French company seeks a partner equipped with robust shredders to cut used polyester, nylon or aramid boat sails into flakes for valorisation / recycling (Ref: TRFR20231005007)

A French SME develops and sells technical boat sails for ocean racing, mainly produced by the petrochemical industry. The SME intends to find second life solution for the sails and seeks a partner interested in recycling them. For example, using a sufficiently robust shredder, the sails could be cut into flakes, to be incorporated into a new product (treadmill, padding, concrete, etc.). A partner specialising in materials recycling is sought under commercial agreement with technical assistance.

Dutch company is looking for technological and social solutions to be used to solve problems on the energy grids (Ref: TRNL20231004003)

In part of the Netherlands, the electricity grid is being congested. The supply and demand side is growing, but the electricity network is not large enough to keep up with this development in the next 7-10 years. For these reasons, the Dutch company launched a challenge, in which they are looking for solutions focused on energy transition and taking into account the overcrowded electricity grid and system integration (electricity, gas, warmth). The Dutch company is looking for partners who want to conduct a pilot at a company or start a project in cooperation with other companies. The partner must have an innovation which is in TRL phase 6-9.

A Bulgarian environmental technology (EnvTech) company is looking for a subcontractor for a HORIZON Europe project under the EIC Accelerator programme (Ref: RDRBG20231020002)

The Bulgarian environmental technology (EnvTech) company offering data-driven environmental and smart city solutions for improving the environmental stability and efficiency of cities and governments towards the net zero transition is looking for a subcontractor for funding under the EIC Accelerator programme. Deadline for Expression of Interest: 31st October 2023.

Clean Energy Transition Partnership: Development of an energy hybrid system (solar-wind-storage) for residential applications (Ref: RDRES20231010008)

A Spanish company, specialised in the design, development and manufacture of battery systems for stationary energy storage, is preparing a project proposal for CETP (Clean Energy Transition Partnership) for the development of a hybrid system, with storage and EMS (Energy Management System) specifically designed for residential applications. An inverter developer or manufacturer and a wind turbine manufacturer are sought for system simulation and testing. Deadline for Expression of Interest: 27th October 2023.

Spanish SME specialized in the integration of nature and architecture with Nature Based Solutions is looking for an expertise partner in botanical genetics/plants resilience to apply to BiodivNBS Call for Transnational Research Proposals (Ref: DRES20231002010)

Spanish SME specialized in the integration of nature and architecture with vertical gardens, green roofs, natural pools and landscaping projects requires botany or botanical genetics expertise in plants resilience in hostile environments or environmental stress to jointly participate in in the call BiodivNBS Transnational Research Proposals on NBS. The proposal aims to co-develop unique thermal and acoustic insulating green walls with a low C-Footprint.
